

**AMENDMENTS TO THE CLAIMS**

This listing of claims replaces all prior versions of claims in the application.

Claim 1 (Currently Amended) A double-stick adhesive tape for a wig, which has a net member as a portion of a wig base, comprising:

two adhesive surface layers, wherein at least a side of the adhesive layer to the net member has a thickness more than half of a diameter of the net member and at least one side of the adhesive layer is deglossed

~~at least one surface of the two adhesive surface layers is deglossed.~~

Claim 2 (Currently Amended) The double-stick adhesive tape for the wig as set forth in claim 1, ~~characterized in that minute concavity and convexity are formed on the surface of said adhesive layer, thereby said surface is deglossed~~ wherein the side of the adhesive layer to the net member has a thickness range between 50 and 200  $\mu\text{m}$ .

Claim 3 (Currently Amended) The double-stick adhesive tape for the wig as set forth in claim 2 ~~characterized in that said minute concavity and convexity on the surface of said adhesive layer are provided by pressing said adhesive layer with a press having minute saliences 1,~~ wherein the side of the adhesive layer to the net member has a thickness range between 50 and 200  $\mu\text{m}$  and the other side of the adhesive layer has a thickness range between 50 and 150  $\mu\text{m}$ .

Claim 4 (Currently Amended) The double-stick adhesive tape for the wig as set forth in claim 2, ~~characterized in that said minute concavity and convexity on the surface of said adhesive layer are formed by spray-coating granular adhesive on a surface of a core material~~ 3, wherein the side of the adhesive layer to the net member is deglossed.

Claim 5 (Currently Amended) The double-stick adhesive tape for the wig as set forth in claim 2, ~~characterized in that said~~ 4, wherein the side of the adhesive layer to the net member has minute concavity and convexity on the surface, of said adhesive layer are provided by blast processing such that the surface is deglossed.

Claim 6 (Currently Amended) The double-stick adhesive tape for the wig as set forth in claim 5, ~~characterized in that said blast processing is conducted by using finely crashed dry ice or ice as blast material, and blasting said blast material on to the surface of adhesive layer~~ 4, wherein the concavity and convexity are provided by pressing the adhesive layer with a press.

Claim 7 (Original) The double-stick adhesive tape for the wig as set forth in ~~any one of claims 2-5, characterized in that the deglossing treatment is conducted so that the surface roughness of minute concavity and convexity of said adhesive layer is made larger than light wavelength~~ claim 4, wherein the concavity and convexity are formed by spray-coating granular adhesive on a surface of a core material.

Claim 8 (Currently Amended) ~~[[A]]~~ The double-stick adhesive tape for ~~[[a]]~~ the wig which has a net member as a portion of a wig base, comprising:

~~two adhesive layers of a double-stick adhesive tape, wherein~~

~~a first side of the adhesive layers is formed to have a thickness to bury more than half of a~~

~~wire diameter of said net member as set forth in claim 4, wherein the concavity and convexity are~~

formed by blast processing.

Claim 9 (Previously Presented) A double-stick adhesive tape for a wig which has a net member as a portion of a wig base, comprising:

two adhesive layers of a double-stick adhesive tape, wherein a first side of the adhesive layers is formed to have a thickness to bury more than half of a wire diameter of said net member, and a second side of said adhesive layers is deglossed.

Claim 10 (Original) The double-stick adhesive tape for the wig as set forth in claim 9 characterized in that one side of said adhesive layers is formed to have a thickness equal to, or more than a wire diameter of said net member.

Claim 11 (Original) The double-stick adhesive tape for the wig as set forth in claim 10, characterized in that the thickness of one side of said adhesive layers is in the range between 50 and 200  $\mu\text{m}$ .

Claim 12 (Original) The double-stick adhesive tape for the wig as set forth in any one of claims 1, 2, 8, and 9, characterized in that the other side of said adhesive layers is formed to have the thickness equal to, or more than the diameter of a hair.

Claim 13 (Original) The double-stick adhesive tape for the wig as set forth in claim 12, characterized in that the thickness of the other side of said adhesive layers is 50  $\mu\text{m}$  or more.

Claim 14 (Withdrawn) A wig characterized in that it is the wig comprising:  
a wig base having a net member at least as a portion;  
hairs implanted to said wig base; and  
double-stick adhesive tapes for the wig having adhesive layers on both sides of a core material respectively, with one side of the adhesive layers bonded to said wig base, and with the other side of the adhesive layers bonded to a wearer's head; and  
the surface of said one side of the adhesive layers of said double stick adhesive tape is deglossed.

Claim 15 (Withdrawn) A wig characterized in that it is the wig comprising:  
a wig base having net member at least as a portion;  
hairs implanted to said wig base; and

double-stick adhesive tapes having adhesive layers on both sides of a core material respectively, with one side of the adhesive layers bonded to said wig base, and with the other side of the adhesive layers bonded to a wearer's head; and

the surface of said one side of the adhesive layers of said double stick adhesive tape is deglossed, and said deglossed side of the adhesive layers is set inside of the network of said net member, and bonded to said net member.

Claim 16 (Withdrawn) The wig as set forth in claim 14 or 15, characterized in that the surface of said one side of adhesive layers of said double stick adhesive tape is deglossed by forming minute concavity and convexity on it.

Claim 17 (Withdrawn) The wig as set forth in claim 14 or 15, characterized in that said minute concavity and convexity on the surface of said one side of adhesive layers are provided by pressing said adhesive layer with a press having minute saliences.

Claim 18 (Withdrawn) The wig as set forth in claim 14 or 15, characterized in that said minute concavity and convexity on the surface of said one side of adhesive layers are formed by spray-coating granular adhesive on the surface of the core material.

Claim 19 (Withdrawn) The wig as set forth in claim 14 or 15, characterized in that said minute concavity and convexity on the surface of said one side of adhesive layers are provided by blast processing.

Claim 20 (Withdrawn) The wig as set forth in claim 19, characterized in that said blast processing is conducted by using finely crashed dry ice or ice as blast material, and blasting said blast material onto the surface of said one side of adhesive layers.

Claim 21 (Withdrawn) The wig as set forth in claim 16, characterized in that the surface roughness of said minute concavity and convexity is made larger than light wavelength.

Claim 22 (Withdrawn) A wig characterized in that it is the wig comprising:  
a wig base having a net member at least as a portion;  
hairs implanted to said wig base; and  
double-stick adhesive tapes having adhesive layers on both sides of a core material respectively, with one side of the adhesive layers bonded to said wig base, and with the other side of the adhesive layers bonded to a wearer's head; and  
said one side of the adhesive layers of said double-stick adhesive tape is formed to have a thickness to bury more than half of a wire diameter of said net member, and said one side of the adhesive layers is set inside of the network of said net member, and bonded to said net member.

Claim 23 (Withdrawn) A wig characterized in that it is the wig comprising:

a wig base comprising net member at least as a portion;

hairs implanted to said wig base; and

double-stick adhesive tapes having adhesive layers on both sides of a core material

respectively, with one side of the adhesive layers bonded to said wig base, and with the other side of the adhesive layers bonded to a wearer's head; and

said one side of the adhesive layers of said double-stick adhesive tape is formed to have a thickness to bury more than half of a wire diameter of said net member, and the surface of said one side of the adhesive layers is deglossed; and

said one side of the adhesive layers is set inside of the network of said net member, and bonded to said net member.

Claim 24 (Withdrawn) The wig as set forth in claim 16, characterized in that one side of adhesive layers of said double-stick adhesive tape is formed to have a thickness equal to, or more than said net member.

Claim 25 (Withdrawn) The wig as set forth in claim 24, characterized in that the thickness of one side of adhesive layers of said double-stick adhesive tape is in the range between 50 and 200  $\mu\text{m}$ .

Application No.: 10/544,573  
Art Unit: 3732

Amendment Under 37 C.F.R. §1.111  
Attorney Docket No.: 052875

Claim 26 (Withdrawn) The wig as set forth in any one of claims 14, 15, 22 or 23, characterized in that the other side of adhesive layers of said double-stick adhesive tape is formed to have the thickness equal to, or more than the diameter of a hair.

Claim 27 (Withdrawn) The wig as set forth in claim 26, characterized in that the thickness of the other side of adhesive layers of said double-stick adhesive tape is 50  $\mu\text{m}$  or more.
